# Extra sources for Beovision

A Beovision TV can get extra audio inputs by attaching a Beolink converter type 1611, 1612 or 1614 to the Masterlink connection.
The AAL connector on the Beolink Converter will be activated by an Audio source command. The Beovision has to be set top A.OPT 2 or 6 to be able to receive both audio and video commands.

A MCL2AV (opt. 2.5) connected to the AAL connector on the Beolink converter makes it possible to control Beogram / Beogram CD with the CD command and Beocord tape players with the A.TAPE or A.MEM command. The connected players has to be datalink compatible and have all 7 pins in the DIN connector.

All other Audio commands like RADIO and PHONO will be redirected to the screw terminal connector on the MCL2AV. Here it is possible to connect an extra audio source by connecting to the L, R and ground terminals. Sound quality for this connections may vary.

Beovision with Masterlink (V.OPT 2 or V.OPT 6)

MASTER LINK *

ML

BEOLINK CONVERTER 1611/1612/1614**

AAL

7 PIN AUDIO AUX CABLE

BEOGRAM / BEOGRAM CD

CD

BEOCORD

A.TAPE
A.MEM

MCL 2AV (L.OPT. 2.5)

TAPE CD AUX
